Profile Summary

I find immense joy in creating snappy & dynamic web designs on the front-end, while maintaining DRY & scalable code on the back-end. I take pride in the communication & leadership skills I developed through my background in film, as they have enabled me to feel at home both as an independent coder & as a collaborative team member. Above all, the opportunity to use my creativity to solve problems has been the greatest gift programming has given me.

Technical Skills

Languages: JavaScript, Ruby, HTML, CSS, Sass, XML, JSON

Frameworks & Libraries: React, jQuery, Rails, Express, Node.js, Socket.IO, Axios, Cypress, Jest, Mocha & Chai

Databases & Data Management: PostgreSQL, ERD, Normalization

Tools & Dev Environments: Git, GitHub, DevTools, VS Code, WSL2, Adobe Photoshop & Illustrator

Education

Lighthouse Labs (2024 – 2025)

Diploma: Web Development

Projects
